## Fertilizing scheme Bio Nova Veganics (ml per 10 litre)

All amounts are in ml per 10 L	Growth period	Start Flowering			Mid Flowering			End Flowering		Last week/ Flush
<b>Veganics Grow</b> Vegan Main nutrient	30	30	25	25	20	18	15	5	-	-
<b>Veganics Bloom</b> Vegan Main nutrient	13	25	30	40	45	45	45	35	20	-
<b>PK 13-14</b> Flowering booster mineral	-	-	2,5	4	6,5	9	10	7,5	5	-
<b>BN Roots</b> Organic Root stimulator	Once 100ml/ 10 L	-	-	-	Once 100ml/ 10 L	-	-	-	-	-
<b>X-cel</b> Organic Growing and flowering booster	5	5	5	5	10	10	10	10	7,5	-
<b>The Missing Link</b> Organic Growing and flowering booster	5	5	5	5	5	5	5	5	5	-
<b>BN-Zym</b> Organic Substrate amplifier	2,5	2,5	2,5	2,5	2,5	2,5	2,5	2,5	2,5	-
<b>Silution</b> Mineral Plant strengthener	2,5	2,5	2,5	2,5	2,5	2,5	2,5	2,5	2,5	-

### Useful tips for the use of Veganics fertilizing scheme

- First add water to the feed vessel, then add the main nutrients and stir well.
- In areas of soft water it is recommended to add Ca 15 to the main nutrients.
- Leave the mix for one hour and then adjust the pH value to pH 5.8 if necessary.
- The dosage of the main nutrient can be adjusted in steps of ±10%.
- Do not use nutrients in the last week before harvest.
- Use BN Roots when planting and repeat after 30 days. In periods of high stress in the plants we recommend using BN Roots every week.
- Dosage may be adjusted at your discretion.
